MEMORANDUM FOR: Assistant Director, Current Intelligence

SUBJECT : Preliminary Evaluation of Mission 0064E,
Flown on 29 February 1964

1. This mission, the fifth in the South Vietnam-Laos-Cambodia border series, reported no significant items of immediate intelligence value. It was flown primarily over North Vietnam which, unfortunately, was heavily cloud covered. Some photography on targets in Laos was acquired, however.

2. Five suspect infiltration areas, four military areas, four airfields and various other targets, most of which were photographed in previous missions of this series, were covered again. No Viet Cong activity of any sort was discernible.
